

SITE COMMANDER

Site Commander's server is custom, heavy duty and built to last through active construction zones. The unit itself weighs 220 pounds and is immobile once placed as custom handles are retrofitted only in the transport process.

The server boasts a 8 core CPU, 5 2TB harddrives for storage capacity and 16gb of ram. The CPU and other components are fully upgradeable. The server also has two display ports as well as multiple USB options.

SC-SERVER FEATURES

- ▲ Digital Display
- ▲ Automatic events notification via Email
- ▲ L530 Amp power requirement
- ▲ Web-managed system
- ▲ Rugged, industrial grade housing
